IT'S NOT HOW SMART YOU ARE, IT'S HOW YOU ARE SMART
Howard Gardner's Theory of Multiple Intelligence
@ Sunbeam Sarnath

Each child is special ! Howard Gardner of Harvard University has identified eight intelligence that we all possess. Some of the intelligence are very dominant while some are dormant. Knowing the dominant areas of your child will help you provide opportunities for the child to excel in his/her area of expertise/interest and improve his/her learning ability. The Festival of Multiple Intelligence will help you identify your child's dominant and dormant areas.
